

Order of Operations

These are the rules for the order of operations:

- First multiply or divide. Work in order from left to right.
- Then add or subtract. Work in order from left to right.

By: Twiceblessed

Order of Operations

These are the rules for the order of operations:

- First multiply or divide. Work in order from left to right.
- Then add or subtract. Work in order from left to right.

Directions: Use order of operations to solve.

$$18 - 5 + 6 =$$

1
Twiceblessed

Order of Operations

These are the rules for the order of operations:

- First multiply or divide. Work in order from left to right.
- Then add or subtract. Work in order from left to right.

Directions: Use order of operations to solve.

$$9 + 6 - 7 =$$

2
Twiceblessed

Order of Operations

These are the rules for the order of operations:

- First multiply or divide. Work in order from left to right.
- Then add or subtract. Work in order from left to right.

Directions: Use order of operations to solve.

$$8 \times 6 \div 4 =$$

3
Twiceblessed

Order of Operations

These are the rules for the order of operations:

- First multiply or divide. Work in order from left to right.
- Then add or subtract. Work in order from left to right.

Directions: Use order of operations to solve.

$$54 \div 6 \times 3 =$$

4
Twiceblessed

Order of Operations

These are the rules for the order of operations:

- First multiply or divide. Work in order from left to right.
- Then add or subtract. Work in order from left to right.

Directions: Use order of operations to solve.

$$20 + 20 - 16 =$$

5
Twiceblessed

Order of Operations

These are the rules for the order of operations:

- First multiply or divide. Work in order from left to right.
- Then add or subtract. Work in order from left to right.

Directions: Use order of operations to solve.

$$85 - 15 \times 2 =$$

6
Twiceblessed

Order of Operations

These are the rules for the order of operations:

- First multiply or divide. Work in order from left to right.
- Then add or subtract. Work in order from left to right.

Directions: Use order of operations to solve.

$$10 \div 5 + 5 \times 3 =$$

7
Twiceblessed

Order of Operations

These are the rules for the order of operations:

- First multiply or divide. Work in order from left to right.
- Then add or subtract. Work in order from left to right.

Directions: Use order of operations to solve.

$$8 - 4 \div 4 + 4 =$$

8
Twiceblessed

Order of Operations

These are the rules for the order of operations:

- First multiply or divide. Work in order from left to right.
- Then add or subtract. Work in order from left to right.

Directions: Use order of operations to solve.

$$24 + 4 \div 4 - 5 =$$

9
Twiceblessed

Order of Operations

These are the rules for the order of operations:

- First multiply or divide. Work in order from left to right.
- Then add or subtract. Work in order from left to right.

Directions: Use order of operations to solve.

$$35 - 5 + 10 \div 2 =$$

10
Twiceblessed

Order of Operations

These are the rules for the order of operations:

- First multiply or divide. Work in order from left to right.
- Then add or subtract. Work in order from left to right.

Directions: Use order of operations to solve.

$$6 \times 6 + 10 \div 5 - 1 =$$

11
Twiceblessed

Order of Operations

These are the rules for the order of operations:

- First multiply or divide. Work in order from left to right.
- Then add or subtract. Work in order from left to right.

Directions: Use order of operations to solve.

$$64 \div 8 \times 10 - 40 - 5 =$$

12
Twiceblessed

Order of Operations

These are the rules for the order of operations:

- First multiply or divide. Work in order from left to right.
- Then add or subtract. Work in order from left to right.

Directions: Use order of operations to solve.

$$30 \div 6 \times 9 + 9 - 1 =$$

13
Twiceblessed

Order of Operations

These are the rules for the order of operations:

- First multiply or divide. Work in order from left to right.
- Then add or subtract. Work in order from left to right.

Directions: Use order of operations to solve.

$$25 \times 3 - 50 \div 2 + 25 =$$

14
Twiceblessed

Order of Operations

These are the rules for the order of operations:

- First multiply or divide. Work in order from left to right.
- Then add or subtract. Work in order from left to right.

Directions: Use order of operations to solve.

$$18 + 6 \div 2 - 11 + 5 =$$

15
Twiceblessed

Order of Operations

These are the rules for the order of operations:

- First multiply or divide. Work in order from left to right.
- Then add or subtract. Work in order from left to right.

Directions: Use order of operations to solve.

$$20 \div 4 + 54 \div 6 + 4 =$$

16
Twiceblessed

Order of Operations

These are the rules for the order of operations:

- First multiply or divide. Work in order from left to right.
- Then add or subtract. Work in order from left to right.

Directions: Use order of operations to solve.

$$45 \div 5 - 1 + 3 \times 7 =$$

18
Twiceblessed

Order of Operations

These are the rules for the order of operations:

- First multiply or divide. Work in order from left to right.
- Then add or subtract. Work in order from left to right.

Directions: Use order of operations to solve.

$$7 \times 30 - 10 + 150 \div 3 =$$

17
Twiceblessed

Order of Operations

These are the rules for the order of operations:

- First multiply or divide. Work in order from left to right.
- Then add or subtract. Work in order from left to right.

Directions: Use order of operations to solve.

$$44 \div 2 \times 3 - 12 + 4 =$$

19
Twiceblessed

Order of Operations

These are the rules for the order of operations:

- First multiply or divide. Work in order from left to right.
- Then add or subtract. Work in order from left to right.

Directions: Use order of operations to solve.

$$20 \times 5 - 50 \times 2 + 0 =$$

20
Twiceblessed

Order of Operations

These are the rules for the order of operations:

- First multiply or divide. Work in order from left to right.
- Then add or subtract. Work in order from left to right.

Directions: Use order of operations to solve.

$$30 + 20 - 25 \div 5 \times 5 =$$

21
Twiceblessed

Order of Operations

These are the rules for the order of operations:

- First multiply or divide. Work in order from left to right.
- Then add or subtract. Work in order from left to right.

Directions: Use order of operations to solve.

$$200 \div 4 \times 3 - 50 + 1 =$$

22
Twiceblessed

Order of Operations

These are the rules for the order of operations:

- First multiply or divide. Work in order from left to right.
- Then add or subtract. Work in order from left to right.

Directions: Use order of operations to solve.

$$6 + 54 \div 2 - 4 \times 5 =$$

23
Twiceblessed

Order of Operations

These are the rules for the order of operations:

- First multiply or divide. Work in order from left to right.
- Then add or subtract. Work in order from left to right.

Directions: Find the missing operation sign.

$$5 + 27 \text{ --- } 3 = 14$$

24
Twiceblessed

Order of Operations

These are the rules for the order of operations:

- First multiply or divide. Work in order from left to right.
- Then add or subtract. Work in order from left to right.

Directions: Find the missing operation sign.

$$42 \text{ --- } 3 \times 3 = 33$$

25
Twiceblessed

Order of Operations

These are the rules for the order of operations:

- First multiply or divide. Work in order from left to right.
- Then add or subtract. Work in order from left to right.

Directions: Find the missing operation sign.

$$11 \text{ --- } 4 + 5 = 49$$

26
Twiceblessed

Order of Operations

These are the rules for the order of operations:

- First multiply or divide. Work in order from left to right.
- Then add or subtract. Work in order from left to right.

Directions: Find the missing operation sign.

$$72 - 9 \text{ --- } 7 = 9$$

27
Twiceblessed

Order of Operations

These are the rules for the order of operations:

- First multiply or divide. Work in order from left to right.
- Then add or subtract. Work in order from left to right.

Directions: Find the missing operation sign.

$$35 + 5 _ _ _ 4 \div 2 = 45$$

28

Twiceblessed

Order of Operations

These are the rules for the order of operations:

- First multiply or divide. Work in order from left to right.
- Then add or subtract. Work in order from left to right.

Directions: Find the missing operation sign.

$$50 \times 3 - 24 \div 6 _ _ _ 10 = 156$$

29

Twiceblessed

Order of Operations

These are the rules for the order of operations:

- First multiply or divide. Work in order from left to right.
- Then add or subtract. Work in order from left to right.

Directions: Find the missing operation sign.

$$3 \times 4 _ _ _ 6 + 5 \div 5 =$$

30

Twiceblessed

Order of Operations
