

A male **cardinal** feeds its young and models how to sing.

A **snapping turtle** lays its eggs in the dirt and then covers the eggs.

A **chipmunk** hibernates in a leafy nest.

Monarch butterflies migrate in huge numbers south to Mexico for the winter and then back north to Canada for the summer. It takes several generations for the butterflies to complete the journey.

A weaver bird builds a nest.

A **chimpanzee** uses a rock to break open nuts.

A **honey bee** does a waggle dance to communicate location and distance to food.

A **dolphin** uses a sponge to protect its nose and scare up fish to eat.

A **spider** spins a web and lays in wait for its prey.

A New Caledonian crow
uses a stick to get grubs out
a tree.
